Australian East Coast Operations

AUSTIN ENGINEERING'S EAST COAST OPERATIONS CONSIST OF THE BRISBANE, MACKAY AND HUNTER VALLEY BRANCHES.

Our primary manufacturing facility is based in Brisbane at Carole Park. This central location forms the core of our East Coast Operations for engineering, processing and manufacture.

Being fully equipped with a large steel processing section, including full blast and paint facilities, enables the East Coast Operations to maintain quality standards and manufacturing schedules to meet our customers' requirements.

Both the Mackay and Hunter Valley operations are set up for overflow, manufacturing fully manufactured bodies and flat pack assemblies.

In addition to manufacturing, our operations offer extensive repair and maintenance capabilities including field service mobile units.

As a whole, the supply capacity of the East Coast can accommodate in excess of 50,000 operating hours per month.

Austin Engineering - Brisbane

CAPABILITIES

Workshop facility size	5,058m ²
Hard stand space	18,000m ²
Equipment	1 x 50, 2 x 25 and 4 x 10 tonne overhead travelling gantry cranes, 1 tonne wall crane, 1000 tonne brake press, industrial blasting and coating workshop covering 1,750m ² serviced by 2 x 10 tonne overhead cranes, a 2,750m ² hard stand section and 20m x 6m x 6m blast room.
Speciality equipment	The largest portal gantry-mounted robotic welding system in Australia. Plasma cutter with 24m x 3m dry cutting bed for plate up to 180mm thick.
Main products/services	OEM and custom mining bodies and buckets.
Specialist products/services	Blasting and painting, specialised fabrication.

Austin Engineering - Hunter Valley

CAPABILITIES

Workshop facility size	2,000m ²
Hard stand space	26,000m ²
Equipment	50 tonne overhead crane, 100 tonne press, 3 metre x 10mm guillotine, PanBrake, 600HP 70 tonne capacity low-loader.
Speciality equipment	Purpose built blast and spray painting bay, 6 x field service boilermaking vehicles – mine spec.
Main products/services	Steel fabrication of new products, refurbishment and repairs, blasting and painting.
Specialist products/services	Dissimilar metals and casting repairs.
