

OEM Services from Austin Engineering

AUSTIN ENGINEERING PROVIDES A RANGE OF SERVICES TO ORIGINAL EQUIPMENT MANUFACTURERS (OEMs) IN RELATION TO OFF-HIGHWAY DUMP TRUCK BODIES AND MINING BUCKETS.

Our experienced technicians apply the latest welding techniques during the fabrication process.

This, along with adherence to Austin Engineering's quality assurance program, ensures the OEM product

is manufactured to the highest quality standards.

Our experience in working with OEMs means we can be relied on to maintain confidentiality and protect the OEM's IP.

ENGINEERING SERVICES

We are able to partner with the OEM to design improvements to the product as requested, and provide engineering support services.

BUCKET MANUFACTURE

Austin Engineering provide manufacturing services for OEM designed buckets, or custom designed buckets for OEM equipment.

We also modify, upgrade and install custom liner kits on OEM buckets.

COMPLETE BODY MANUFACTURE

Austin Engineering provide complete fabrication services for OEM designed bodies, or custom designed bodies for OEM equipment.

MANUFACTURE OF FLAT PACK BODIES

We manufacture OEM designed bodies in flat pack configuration for shipping to site.

BODY ASSEMBLY SERVICES

Our experienced technicians assemble OEM manufactured flat pack bodies ready for installation onto OEM equipment.

ON-SITE INSTALLATION SERVICES

Austin Engineering can provide complete installation services for bodies and buckets onto on-site OEM equipment.
