US Proceedings against Westech Dismissed

Brisbane, 15 January 2016: (Austin Engineering Limited - ASX trading code: ANG)

On January 13, 2016, the U.S. District Court for the Central District of Illinois dismissed the patent infringement case brought in 2012 by Philippi-Hagenbuch Inc. and LeRoy Hagenbuch against Westech, to which its WOTCO subsidiary was later added as an additional defendant. All claims and counterclaims were dismissed with prejudice, with each party to bear its own attorneys' fees and costs.

The Company is pleased with this outcome, which allows Westech's US operations to continue normal business activities.

End

For further information on the above, please contact Managing Director Michael Buckland, or Chief Financial Officer Scott Richardson, on +61 7 3271 2622.

About Austin Engineering: Austin Engineering Limited is an engineering company with manufacturing facilities in Australia, the USA, South America, and Indonesia. The Australian facilities manufacture, assemble, repair and maintain (on and off-site) products used in the mining and resources sector. Key product lines include dump truck bodies, large service vehicles, excavator buckets, materials handling equipment, mineral processing equipment, industrial radiator and cooling products as well as large structural steel projects. The USA facility (Westech) based in Casper, Wyoming, services the North American and Canadian mining markets and is an industry-leading designer and manufacturer of high-efficiency dump truck bodies. The operations located in Chile, Peru and Colombia manufacture, repair and maintain dump truck bodies and other mining products for their respective markets and, in Chile, also provide specialised heavy equipment lifting and transportation services for mining and industrial markets. The Indonesian production facility on Batam Island serves the equipment and service needs of mining and oil and gas-related customers in Indonesia and Asia. Austin also own rights to innovative and automated welding processes and these have been introduced into operations in order to improve production efficiencies.
